

Terätoimitus Lehtinen Oy

Why choose Terätoimitus?

A few things set us apart from our competitors. We focus on bringing added value to our customers' everyday life through these factors. The same factors have guided our operations for decades.

Finnish quality

We are a Finnish operator from start to finish. We do all the work at our own factory in one spot. This guarantees reliability for deliveries and speed for service.

Competence

Tens of years of expertise brings experience. Thanks to what helps us to know what you need and to help us to find a correct tooling solution for your work.

Quality

Modern machinery, the latest machine software and maintenance techniques guarantee the quality of a finished grinding — every time.

Speed

We do all the service and grinding work ourselves. It enables a quick reaction even to unexpected situations. A solution for a problem can often be found quickly.

New tools

We can offer a wide range of standard tools from our warehouse. Thanks to our selected and qualified supplier network, shank tools, cutters, drills and sawblades can be found for many different solutions.

Examples of our machine fleet

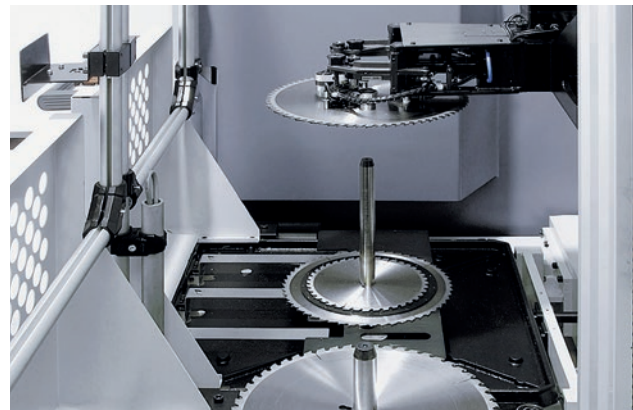

We operate Finland's widest selection of machinery for servicing the woodworking industry. Our modern and up-to-date machinery guarantees fast delivery times and consistent quality. Our customers are always welcome to visit our company and see how we do our work. A visit to our company is an eye-opener.

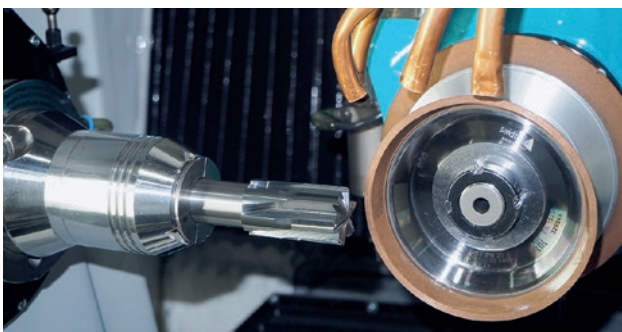

PCD

Sharpening of pcd-tools precisely and quickly with the power of 4 erosion machines. Most versatile and our most modern pcd grinding machine on the market can service all types of diamond blades.

Saw blades

Sharpening of HW and HS saw blades, for all tooth shapes and groups. In the latest, fast and the precise machine has the most advanced measuring technology on the market, which measures also grinding wheels and compensates wheels wear and tear.

Solid TC cutters

Five-axis CNC grinding machines for profiling blanks and solid TC spiral tools. Also the manufacture of special tools. The latest technology on the market.

Profile knives and cutters

Profile grinding, re-sharpening and re-tipping cutters with the power of 5 CNC grinding machines. We are capable for grinding of many types of tools, from big ones to small, on a wide scale.
